SKILLS

Languages: JavaScript, TypeScript, Kotlin, C++, C

Frontend: React Native, React.js, HTML, CSS

Backend: Node.js, Express.js, Socket.IO

State Management: Redux, Redux Toolkit, Context API

Databases & Cloud: MongoDB, SQL, Firebase

Tools & Technologies: Git, SVN, Android Studio, Xcode, Postman, Jira, Figma

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

PROFESSIONAL EXPERIENCE

Associate Software Developer | Kindlife, Gurugram

September 2024 – Present

- Owned end-to-end development and maintenance of the **Kindlife React Native** application, building **reusable components** and scalable **component architecture** while delivering core features including **Livestream, Quick Commerce, Search, Cart, Product Detail Pages (PDP), Watch Page, Deep Linking, Dynamic App Icons, and Checkout**.
 - Led the **React Native 0.73 → 0.85** upgrade, resolving **native module, dependency compatibility**, and **React Native New Architecture (Fabric/TurboModules)** issues while improving **code quality, maintainability**, and platform compatibility.
 - Developed **native React Native bridge modules** using **Kotlin (Android)** and **Swift (iOS)** to integrate **location services** and **reverse geocoding**, extending native platform capabilities.
 - Engineered a **Node.js** service for **Firebase Cloud Messaging (FCM)**, reducing push notification delivery time from approximately **90 minutes to under 30 seconds**.
 - Built a **Socket.IO**-based real-time communication service to synchronize **cart** and **wishlist** data across mobile and web, while delivering **livestream broadcast events** with low latency.
 - Migrated **Firebase Dynamic Links** to **Android App Links** and **iOS Universal Links**, improving **deep linking** reliability and web-to-app navigation.
 - Designed and implemented **location-aware Quick Commerce** workflows with **pincode validation, delivery availability**, and **address resolution** to support scalable hyperlocal commerce experiences.
 - Optimized livestream infrastructure to scale concurrent users from **~100 to 2,000+**, increasing capacity by **~20x** and improving real-time communication reliability.
 - Designed and implemented a **custom OTA** update system for React Native, enabling controlled **JavaScript and asset updates**.
 - Debugged** and resolved production issues across the **React Native** application, **Node.js APIs, SQL databases**, and **third-party SDKs**, improving application stability, release reliability, and overall **code quality**.
 - Managed end-to-end **Google Play and App Store releases**, including builds, signing, SDK integration, and production deployment.
-

PROJECT

Shared Diary – MERN (MongoDB, Express.js, React.js, Node.js)

September 2024

Repo – AbhishekKrGhosh/shared_diary | **Deployed link –** <https://shared-diary-2.onrender.com>

- Built a collaborative **MERN** web application with **Socket.IO** for real-time communication between shared diary accounts.
 - Implemented **JWT Authentication, Google OAuth**, and **bcryptjs** for secure authentication and authorization.
 - Designed scalable **REST APIs** using **Express.js**, implementing **CRUD operations**, request validation, and centralized error handling.
 - Built a modular **React.js** frontend using **Redux Toolkit, Context API, Redux Persist**, and **React Router**, emphasizing **state management**, reusable components, protected routes, and responsive UI.
-

EDUCATION

B Tech, Computer Science and Engineering, Lovely Professional University

2024

7.99 CGPA

Class XII, CBSE Board

2019

73%

Class X, CBSE Board

2017

9.8 CGPA
